JOB DESCRIPTION

TITLE

Scientific Instrument Repair Technician

JOB SUMMARY

Performs skilled electronic repair and maintenance of scientific equipment. Worked is performed under minimal supervision with evaluation based on acceptable completion of tasks. Work is performed under general supervision and performance is based upon completion of assignments and results obtained. The performance evaluation is conducted through the performance evaluation system and in accordance with the University Policies & Procedures.

ORGANIZATIONAL RELATIONSHIPS

Reports to: Director, Research and Sponsored Programs

Supervises: May supervise Student Assistants

PRIMARY DUTIES - *May include, but not limited to the following:*

Performs, with a high degree of skill, mechanical and electrical layout, construction, modification, testing, adjustment, calibration, and preventive maintenance of simple and complex electronics equipment for use in scientific research.

Performs troubleshooting of simple and complex electronics equipment (e.g. sampling oscilloscopes, multi-channel pulse-height analyzers, nanosecond amplifiers, precision feedback electrometers, digital, etc.)

Originates, modifies, assembles, and maintains complex schematic and wiring diagrams.

Repairs and maintains equipment through corrective and preventative maintenance procedures.

Operates simple machine tools and common electronics instruments, and performs skilled soldering.

Researches sources and orders parts for equipment repair.

Prepares reports as required.

Installs new equipment.

Consults with faculty and staff regarding scientific equipment and computer hardware/software problems.

Consults with maintenance centers on repairs and maintenance.

*Scientific Instrument
Repair Technician
Date Issued: 09/05
FLSA: Non-Exempt
PTO: COVS*

Assists with repairs and calibration of scientific equipment.
Assists in purchasing parts for scientific equipment.
Assists principal investigators with obtaining service from outside vendors.
Assists principal investigators with developing operation and maintenance procedures.
Observes the repair process when an outside service technician repairs or maintains scientific equipment on campus. The information gained can be used in future maintenance and repair of equipment.

ADDITIONAL DUTIES

Performs other duties as requested.

EDUCATION

Associate's degree in physics, electrical engineering, computer science or equivalent technical training required. Bachelor's degree preferred.

EXPERIENCE

Four year's experience in performing electronics work in the maintenance or constructions of technical or scientific electronics equipment or in troubleshooting and repair of radio/television equipment, computer equipment, or electronics instrumentation.

KNOWLEDGE, SKILLS, AND ABILITIES - The following are essential:

Knowledge of modern techniques and theories of electronic repair.

Knowledge of computer hardware helpful.

Ability to effectively communicate, both orally and in writing.

Knowledge of and ability to operate an oscilloscope, audio HF generator, digital and analog voltmeter, caliper, micrometer, personal computer, calculator, telephone, vacuum, frequency counter, sound level meter and other related diagnostic equipment.

Ability to use tools including electric drills, sanders and saws, soldering and de-soldering equipment, hammer, screwdriver, wrenches, pliers and general mechanical tools.

Ability to work in conditions including cold areas, heat, outdoors and indoors, and around mechanical, electrical, explosive, radiation, fumes/odors, dust/mites, chemical and toxic waste hazards.

Ability to use a personal computer and other office equipment.
