

## Driving Directions to TWU Counseling and Family Development Clinic

Texas Woman's University is easily accessible from any direction that you are driving from when you reach Denton. Our campus is conveniently located down Bell Avenue. To access the campus from I35, simply exit at the 380. Turn right at the light and continue on the 380(also known as University) until you reach the intersection of Bell Avenue and University. Turn right on Bell to enter the campus; you will continue through two stop lights (the second light will have an overhead cross walk above it) continue down the street past Stoddard Hall (on the right) and the Human Development Building (on the right). The first street after the Human Development Building is Texas Street where you will turn right. Turn right at the next "street" which is actually the beginning of the parking lot. Parking is available in several locations on the street. The Human Development Building is a two story building on the right past a one story brick building.

When you enter the Human Development Building main entrance, you will go up a flight of stairs, turn right and head down to the Clinic in room 114. When you enter the Clinic, one of the graduate students will be at the reception desk and will greet you. If you have problems finding the Clinic, please feel free to call 940-898-2600.
