Fee Structure

The following matrix presents the minimum fees that are used to establish the fees for service for each child, adult, and family who request services from the Integrated Team. While special circumstances will be considered, this fee structure will be used by the Integrated Team to determine the cost of assessment services upon receipt of the intake report.

A \$20 fee has been established for the intake interview which will include a 60-90 minute interview with the client, the client’s family (if the client is a child), and completion of at least one family instrument useful for determining the needs of the client. If the client decides to accept the recommendation for testing from the Integrated Team, then the \$20 fee will be rolled into the total fee for service. If the client is not seen for assessment services, the \$20 fee will be accepted as payment for the initial interview.
