"Unity on Diversity - Our Legacy to Learn, Labor, Love" was a theme ably presented in workshops, programs and projects of this administration. Concentrating on leadership to lead the Federation into the next century, seminars and workshops were held to develop the talent of leadership. The first "Traveling Team" composed of the President and Executive officers covered the State of Texas during the summer of '94 bringing information, plans, and programs to each of the fourteen districts convened in Summer Workshops. Updated office equipment to enable in-house accounting and bookkeeping was purchased for the office at TFWC Headquarters. This reduced the bookkeeping cost of the organization. A Long Range Planning Committee and a Centennial Committee were appointed to begin planning for the 1997 Centennial Year. The goal of this president was to touch and to know individual members and clubs, thereby strengthening the ties of Federation.
