

## Double Sided Stand Assembly

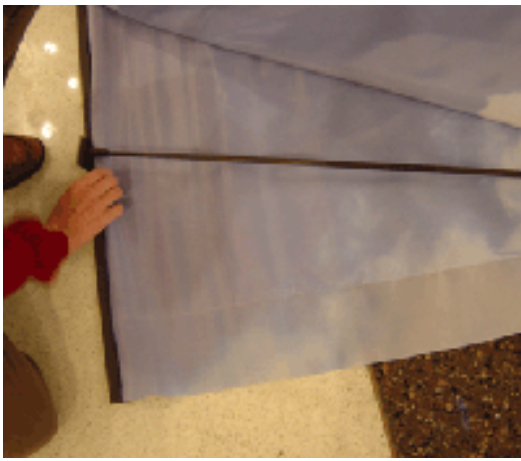

No tools are necessary for assembly of stand. You will need a clean sheet or blanket. Two people may be necessary to assemble.

Lay sheet out on floor (printed side down).

Assemble support rods.

Insert top of the support rod into the groove of the top panel support.

Insert top of the support rod into the groove of the top panel support.

Insert bottom of support rod into base when attached to the rest of the rod.

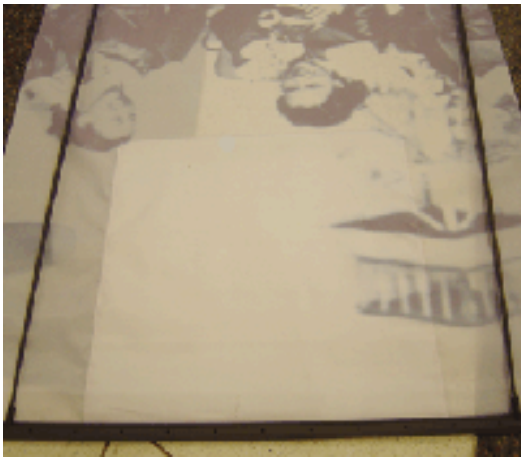

Take the top panel support (of the 2nd panel), and insert the top of the support rod into the groove.

Insert bottom of support rod into base.

Push the support rod towards the top of the panel while pulling the bottom panel support towards yourself. Insert base into the groove at the bottom panel support.

The introductory panel is one sided.

Stand pieces should be set up on introductory panel as shown.
