

## Adding a Certificate Exception in Firefox

---

If you are trying to access TWU Libraries' electronic resources in Firefox and receive a message regarding an invalid security certificate, please follow the instructions below from [Mozilla Support](#).

### **To install the valid, trusted, self-signed certificate:**

1. Click on ***Or you can add an exception*** or ***I understand the risks*** on the warning page.
2. Click ***Add Exception.....*** The ***Add Security Exception*** dialog box will appear.
3. Click ***Get Exception***.
4. Click ***Confirm Security Exception*** to trust the site.
5. If a ***Confirm*** box pops up, click ***Resend***. You should now be able to access the resource.
