

TWU Office of Research and Sponsored Programs

Timeline for Preparing, Routing for Approval, and Submitting a Proposal for External Funding

This is an ideal timeline for a typical proposal submission process. Following this timeline allows adequate time for proposal development, review, and approval by TWU administration. More complex proposals with larger budgets, cost-share, external partners, or programmatic development may require additional time. It is strongly advised that the PI start working with ORSP as soon as a funding source is identified for any proposal. It is also advised that the PI communicate with their chair and dean regarding the project and proposal submission as soon as they know they will be submitting for external funding.
